GAMEPLAY

All of the rules from Explorers & Pirates for 2-6 players apply when playing 5-6 players. There is, however, one rule addition that players of the Catan 5-6 player extension will already be familiar with—the Special Building Phase.

As always, on your turn, you first perform the following three actions:
1. Roll the dice for resource production
2. Trade and build
3. Move your ships and perform ship actions if you wish

And here’s the addition: after you finish your turn, starting with the player to your left, each of your opponents may now, in turn order, perform special builds.

The Special Building Phase

During the Special Building Phase, as stated on page 5 of the Settlers of Catan 5-6 Player Extension rule book, you may build anything that you are able to create with your resources. You may not trade resources with your opponents on the bank (maritime trade). You are not allowed to move your ships, and you may not buy anything with gold. See Example 5, below, for an example of how the Special Building Phase works.

Example 5: Special Building Phase in action.

Cathy has just finished her turn. Before she passes the dice to the player on her left, she asks her opponents whether someone wants to perform a special build. If only player says “yes” that player may build immediately. If more than one player says “yes” then builds must be performed in normal clockwise order. Once all of the special builds are complete, Cathy passes the dice to the player on her left. That player now begins his or her normal turn.
